AN OPEN LETTER TO SEEKERS: MY EXPERIENCE WITH THE 2026 ASTROLOGY COURSE SCAM

A Coalition of Former Students

> **STATEMENT OF PURPOSE**
>
> *This open letter is written by former students who invested heavily in premium online astrology education. It serves as a direct warning to prospective students, detailing the emotional manipulation, the bait-and-switch tactics, and the ultimate realization that the promised spiritual enlightenment was nothing more than a highly optimized sales funnel.*

1. To Those Seeking Cosmic Truth

If you are reading this, you are likely where we were just a few months ago. You are searching for meaning, looking to the stars for guidance, and considering investing your hard-earned money into an online Jyotish academy. We write this open letter to answer the question you are undoubtedly asking yourself: **are expensive astro courses worth it**? Based on our collective, devastating experience in 2026, the answer is a heartbreaking no. We fell victim to **astrology course scams online**, and we are writing to ensure you do not make the same mistake.

2. The Reality of the Deceptive Course

We were lured in by charismatic marketing and the promise of learning from a 'master.' However, what we received was a textbook **lunar astro deceptive course**. The marketing promised deep, esoteric knowledge of the Nakshatras and divisional charts. The reality was a series of pre-recorded, superficial videos that offered no more insight than a free YouTube tutorial. When we requested the advanced teachings we paid for,

we were told we needed to 'upgrade' to the next tier. It was a classic bait-and-switch.

3. Drowning in Hidden Costs

The initial tuition fee, which for many of us was thousands of dollars, was just the beginning. The platform is designed to bleed students dry through **hidden costs in online astrology courses**. We were forced to buy proprietary software just to complete our assignments. Worse, during 'consultations' (which were often conducted by junior students, not the founder), we were told our charts contained severe flaws that could only be fixed by purchasing expensive gemstones directly from the platform. This is not education; it is extortion.

4. The Insult of Fake Certification

After enduring the financial drain and the subpar curriculum, we were awarded our diplomas. We quickly realized we had been handed a **fake astrology certification**. These certificates are not recognized by any legitimate Vedic institution. They are digitally generated PDFs designed to make us feel like we achieved something, when in reality, we had simply reached the end of a sales funnel.

5. Why You Don't See the Complaints

You might wonder why the platform's website has a 4.9-star rating. It is because they actively suppress the truth. When we tried to post our honest **lunar astro course reviews and complaints**, we were met with legal threats, intimidation, and 'cyber cell' tracking warnings. They use proxy accounts to flood review sites with fake positive ratings to drown out our voices. Do not trust the manufactured hype. Protect your spirit and your wallet.
